

YOUR NEW CAREER STARTS HERE

PDI ENGINEER | DERBY, UK

OVERVIEW

OVERVIEW

Star Micronics GB Ltd is the UK market leader in sliding head lathe technology.

Star sliding head lathe technology is the best-in-class with each model featuring the very latest in Japanese engineering.

The PDI team at Star GB are experts in preparing and inspecting our machinery, ready to be delivered to customers and commissioned by our service team.

Reporting to the Service Manager, the role will include installation of accessories, software updates, machine preparation and loading/unloading within our workshop.

Experience of Fanuc control systems and working on CNC lathes is desirable, however sliding head experience is not essential as extensive product training will be provided.

Candidates must have good mechanical skills and some electrical knowledge, with the ability to accurately complete and record all checks in-line with our company procedures.

The candidate must be self-motivated, able to work on their own initiative and within a team when necessary. Effective communication and IT skills are also essential.

A full driving licence is necessary and a forklift licence is desirable.

CRITERIA

A PDI Engineer's responsibilities include:

Inspect new machines arriving at our facility

Accurately complete and record all machine checks

Preparation and installation of machine accessories

Communicate effectively with the operations team

Loading/unloading using fork truck

Document standard procedures and customised accessories

Workshop maintenance
